- MSSQL / MySQL
- PHP
- GIT / GitHub
- JWT Authentication
- BLAZOR / RAZOR
- MVC Framework
- RESTful APIs (Web API)
- JSON / Data Serialization
- Adobe Photoshop
- HTML / CSS / JavaScript
- JQuery / AJAX
- Entity Framework / LINQ
- Error Handling & Debugging
- Adobe Premiere Pro

WORK EXPERIENCE

Ncore Systems (Banking Software (Solutions)) - Web Developer

Remote • 02/2023 - Current

- Develops and maintains banking and remittance systems using ASP.NET MVC (C#).
- Translates business requirements into scalable and maintainable application code.
- Designs and implements database objects including Tables, Views, Stored Procedures, and complex queries (MSSQL).
- Integrates applications with backend services using Web API for CRUD operations.
- Performs unit testing to ensure functionality, reliability, and system stability.
- Manages application deployment and updates on cloud servers using IIS.

TSPI Mutual Benefit Association (Micro-insurance Company) - Junior Programmer

Makati City • 04/2018 - 02/2020

- Created and optimized in-house systems through ASP.NET WebForms (VB.NET), integrating HTML, CSS, and JavaScript (jQuery) for improved functionality and user experience.
- Analyzed system requirements and implemented optimized MSSQL queries and stored procedures for improved operational performance and reporting accuracy.
- Designed and maintained dynamic reports through SQL Server Reporting Services (SSRS) to support operational insights.
- Developed and maintained stored procedures to ensure efficient query handling and data retrieval.
- Delivered technical support by diagnosing and resolving system and programming issues.
- Facilitated user training sessions and supported end-users in effective system utilization.

EDUCATION

Philippine State College of Aeronautics

Pasay, Metro Manila, Philippines • 04/2017

Bachelor of Science: Aviation Information Technology
